FINE-TUNED SCHEDULING

Panasonic
BUSINESS

Room Booking System

The modern workplace

The rapid transition of today's world has built the need for a modern age workspace that is dynamic, flexible, collaborative and connected. The digital world is the new normal where millions of meetings are scheduled on a regular basis and this poses a number of challenges.

More meetings = Socially distanced huddle room management

The more the merrier, does not always work in that manner. With a continuous increase in meetings, office space has become the second-biggest expense for organizations. A workspace which doesn't suit the new era, results in poor functioning and lack of productivity.

Modern office in three steps

Time and space wasters are eradicated through wayfinding information. Interactive, real time and sustainable Room Booking System effectively improves scheduling and finding workspace experience and efficiency.

Upgrade your workspace Experience

Room Booking System upgrades your meeting experience by entering your workspace and eliminating anything that poses a problem to the workers. The customisation feature lets it adopt the company's overall presence, i.e. logo, style and language, which further uplifts the overall experience.

Accentuate workspace Efficiency

Make room for advancements and take control of your workspace. Room Booking System analytics keeps a close check, detects any discrepancy in meetings, undutters calendars to free up space and time while saving rental costs.

The answer is here

Room Booking System By Panasonic

Room Booking System is meant for the modern workspace that advances your meeting culture. Zero hassles when it comes to finding a meeting room. Room Booking System effectively increases productivity which in turn saves time and money.

Optimize scheduling & finding

Room Booking System effectively lets you find and schedule anything required in a workspace. Meetings, conference room or huddle space can be booked on the spot with your existing desktop calendar or your mobile phone.

Simple. Flexible. Frictionless.

Remote or on-the-spot booking on an interactive touch screen. Our most popular Panasonic device comes with advanced Wi-Fi encryption and meeting room analytics for a comprehensive overview of your resources. The best choice for companies that experience meeting interruptions or double bookings.

6-inch (4:3) interactive screen

Full capacitive touch screen interface

Up to 3 months battery autonomy

Available in slate gray or graphite black

LH-RB06TA/LH-RB06TAB

Smart. Slick. Seamless.

Built to be a versatile information board, the device adapts to your needs. Use it to check a single room's availability and upcoming meetings, G Suite, Office 365, Microsoft Exchange, and iCalendar (.ics), or display the occupancy of up to 9 meeting rooms at once. Although ideal for finding and scheduling, the device can also be applied in areas such as hospitality, wayfinding or transportation.

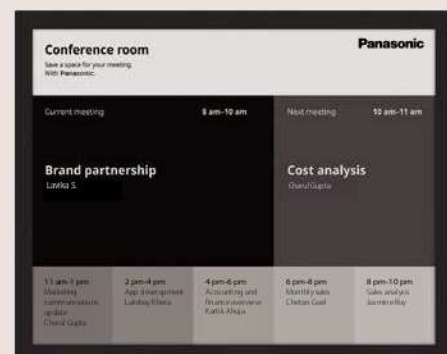

13.3-inch (4:3) non-touch screen

Supports multiple rooms

Up to 12 months battery autonomy

Available in slate gray or graphite black

More people are having more meetings

From installation to use, Panasonic Room Booking System is created to fit, seamlessly and without hassle.

Simple installation

The devices are completely cordless and can be attached to any surface, even glass. Without tools, bolts or brackets.

LCD vs E-Ink

Energy efficient, Go Green

E-Ink Display consumes power only when something is changing unlike LCDs which continuously need power. Thus, they are ~99% more energy efficient than LCDs and with an unparalleled battery life, "Room Booking System" is the most sustainable solution on the market.

Smooth onboarding

Built with an intuitive user interface and a smooth and tested user experience, "Room Booking System" is easy to deploy, manage, and use.

Pays for itself

An ideal solution for those who want to ensure ROI when investing in conference room efficiency.

Integrations

A frictionless work experience, "Room Booking System", seamlessly connects to existing tools used by millions of office workers everyday.

Channel partners

The biggest AV industry experts are set to bring "Room Booking System" to every corner of India and ensure a fast and seamless adoption.

Much more than a device

Portal

Managing all at one place.
Can check battery and WiFi, adjusting device signals, testing beta features.

Roombot

Don't interrupt your work in Slack or any other supported chat application. One message to Roombot gets your meeting scheduled in your room of choice.

A 360° solution

Room analytics

Save on company resources. A weekly report on your company's bookable space usage helps you separate the most popular rooms from the ones left unattended.

Warm welcome

The device automatically sends out a slick reminder email with meeting details and instructions on where to go and who to call in case of questions or changes.

API

Add the device's features to your applications, products, and services and create your own smart office with our free API.
